The vision of the European Green Belt Initiative is to create the backbone of an ecological network, running from the Mediterranean Sea to the Black Sea that is a global symbol for transboundary co-operation in nature conservation and sustainable development.

Borders separate, nature unites.

www.europeangreenbelt.org

The GIS data and within the Green Belt project was kindly provided by the Inspection state authorities for a transboundary project in the EU's green belt. All claims not hold responsibility for the errors, misprints or omissions herein concerning the location status of any country, territory or area.

As at June 2007

The project has been funded by the German Federal Agency for Nature Conservation (BfN) with funds of the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety and by the German Federal Foundation for Environment Protection (DBU).
