

European Green Belt Standardised Publication Content Templates

The following template texts have been developed and recommended by the European Green Belt Scientific Committee. They are intended to ensure consistent acknowledgement of the European Green Belt (EGB) in scientific publications that present results conducted within or related to the EGB area.

Authors are encouraged to use these templates when preparing manuscripts, reports, conference presentations and posters, or other scientific outputs. The texts may be adopted as provided or adapted to individual needs, provided that the reference to the European Green Belt initiative is retained.

Affiliation (European Green Belt)

European Green Belt, c/o [Member Organisation Name], [Street Address], [Postal Code] [City], [Country]

[Primary Affiliation], and European Green Belt, c/o [Member Organisation Name], [City], [Country]

Acknowledgements (no funding)

The authors acknowledge the support of the European Green Belt Scientific Committee, which facilitated networking and exchange relevant to this study.

Funding Statement (if funded)

This work was supported by the European Green Belt Association through its Publication Mini-Grant program, funded in [year].

Suggested Text – Introduction (sample text to be modified for individual needs)

This study was carried out within the framework of the European Green Belt (EGB) initiative, which promotes the conservation of biodiversity, ecological connectivity, and sustainable development along the former Iron Curtain. The research aligns with the objectives of the EGB Scientific Committee to enhance scientific knowledge and foster collaboration among stakeholders in the EGB area.

Suggested Text – Materials and Methods (sample text to be modified for individual needs)

Fieldwork and data analysis were conducted in the context of the European Green Belt (EGB) initiative. The project benefitted from access to [datasets/monitoring protocols] coordinated through the EGB Scientific Committee. All research activities adhered to the standards and guidelines set forth for [ecological/conservation biology/natural sciences/environmental] research within the EGB area.
